Product Availability, Localization & Translation Guide for Microsoft Dynamics GP

Microsoft Dynamics GP is localized, translated and supported by Microsoft and made generally available in the countries* and languages listed below. To learn more about supported versions of Microsoft Dynamics GP localized and/or translated by Microsoft, please refer to the product availability table below. In addition to country-specific localizations and/or translations that Microsoft creates, our channel partners may make partner-created localizations and/or translations of Microsoft Dynamics GP available in countries where Microsoft does not provide a localized or translated version. See the Microsoft Dynamics Localization and Translation Overview below for more information on partner-created solutions.

Country Localizations

Localization is the process of adapting software to meet country-specific laws or regulations. Microsoft localizes Microsoft Dynamics GP to include features and functionality designed to address specific tax, accounting or financial reporting requirements for various countries. Features or functionalities that are available in a particular country may not be available in all countries. Please consult your channel partner for details about product features and capabilities. Also consult them and/or your professional advisers to determine whether this software is appropriate for your business needs in a given country.

Languages

Translation is the process of adapting software or documentation to meet language requirements for a particular country. For any given language, Microsoft may translate some, all or none of the user interface (UI) and documentation for Microsoft Dynamics GP. Contact your channel partner or the local Microsoft office for more information.

*Use of the word country is for convenience only and is not intended to imply sovereignty for any disputed territory that may be mentioned herein.
The **table** below contains product availability information for Microsoft Dynamics GP by country and product version. Subsequent releases of Microsoft Dynamics GP may be localized for additional countries and translated into additional languages.

**Microsoft Dynamics Localization and Translation Overview**

Organizations doing business in a particular country must comply with country-specific laws, regulations and common business practices to handle their daily business transactions and operations and meet their legal obligations for activities conducted in the country. Microsoft recognizes that non-adherence to these laws and regulations can lead to severe consequences for an organization doing business in that country.

As an enterprise resource planning (ERP) solution, Microsoft Dynamics GP software helps organizations manage their various business processes through its extensible architecture. Microsoft extends the business process functionality of its Microsoft Dynamics GP software by developing specific commercial requirements, language, and non-vertical, national or international functionality to address specific tax, accounting or financial reporting requirements for countries where Microsoft makes this software generally available. The process of adapting software to meet local laws or requirements is called localization. The process of adapting software to meet language requirements is called translation.

Since laws and regulations that affect businesses vary in each country, Microsoft Dynamics GP software is not supported in terms of localizations, translations, or technical support in all countries. While Microsoft Dynamics GP software "out-of-the-box" is localized and/or translated to address specific laws and/or regulations for particular countries, it is not supported in terms of localizations, translations, or technical support in all countries. Features or functionalities that are available in a particular country may not be available in all countries.

Rather, we look to our channel partners, who are an important part of our global strategy, to deliver Microsoft Dynamics GP solutions that help customers meet their compliance obligations. Channel partners may adapt the Microsoft Dynamics GP software to:

- Supplement the base Microsoft Dynamics GP application by developing functionality to meet specific laws or regulations that are not covered by features provided "out-of-the-box" (e.g., regulations that are unique to states, provinces, cities, or municipalities in a particular country); or

*Use of the word country is for convenience only and is not intended to imply sovereignty for any disputed territory that may be mentioned herein.

Updated August 2011
• Create their own localizations and/or translations in countries where Microsoft does not offer a localized and/or translated version of Microsoft Dynamics GP software.

Partner-created solutions are owned, implemented, maintained, and serviced by, or on behalf of, the originating channel partner.

**Channel Partner-Created Solutions:**
For additional information about partner-created solutions in your country, please contact your Microsoft channel partner or local Microsoft office, or utilize the Microsoft Dynamics Marketplace ([http://dynamics-erp.pinpoint.microsoft.com](http://dynamics-erp.pinpoint.microsoft.com)) to identify channel partner solutions that might be available in your country.
